

# ImagePilot

## *Benefits of "Going Digital"...*

*With Konica's ImagePilot solution your practice can realize a wealth of benefits at an affordable price.*

### *Dark Room Benefits...*

- Eliminates the need for a dark room.

### *Processor Benefits...*

- Eliminates the need for owning and maintaining the processor.
- Eliminates the need for messy, toxic chemicals.
- Eliminates the worry for chemical disposal.

### *Film Related Benefits...*

- Eliminates your film storage (no additional films added).
- Eliminates lost films.
- Eliminates the cost of films.

### *Quick and easy setup, user-friendly...*

- Enables One-Step acquisition.
- Produces consistent, high-quality images out of the box.
- Reduces re-takes by focusing on positioning only.
- No changes to your existing X-Ray room.

### *Integration*

- Ability to send images outside your facility (no more couriers/film).
- Ability to send & receive images from media (CD, DVD, or USB.)
- Ability to send JPEG images to an EMR.

## The ImagePilot CR System is a new generation CR

The system that dramatically simplifies CR image acquisition to a push of a button. This is possible with AutoPilot Image Processing, which automates the image optimization process with a universal algorithm independent of body site information.

KONICA MINOLTA

In addition, ImagePilot pioneers the true meaning of an integrated CR system, as it combines CR acquisition, patient registration, image viewing and storage in one easy to use and maintain system.

## ImagePilot CR

**\$53,999**
